ETYMOLOGY OF SCOTTISH PLACE NAMES.

(REVISED BY JAS. BURGESS, C.I.E., LL.D., F.R.S.E.)

As the great majority of names of mountains, rivers, towns, and other localities in Scotland, are composed of Gaelic, Norse, and Saxon words descriptive of some special characteristic, the following glossary will be found useful for their interpretation, and may, in many cases, be interesting as a key to past physical conditions and history. The list has been compiled from the works of Dr. W. F. Skene, Sir Herbert Maxwell, Col. J. A. Robertson, the Rev. J. B. Johnston and other authorities, and gives the generally accepted meanings of the more important significant words and generic terms which enter into the composition of Scottish place names. The interpretation of Gaelic names in the Highlands will be found much simpler than in the case of Lowland names which have undergone modification in proportion as the spoken language of to-day is very different from that of a few centuries ago, when many of the names originated. Names of doubtful meaning, on which authorities differ, have been omitted.—J. G. B.

ABBREVIATIONS-A. S., Anglo-Saxon; Gael., Gaelic; O.E., Old English; Teut., Teutonic.

ABBREVIATIONS—A. S., Anglo-Saxon; Gael., Gaelic; O.E., Old English; Teut., Teutonic.
